

Greetings Touro Student Physician Colleagues:

As a quick introduction to some of the topics I will be covering, I'd like you to use the time prior to my discussions to review some very brief, high yield 'self-study bulletins (5-10 minutes each to read) from the American College of Rheumatology.

Though written primarily for patients, they are actually quite useful for clinicians, especially early in their careers and as refreshers for even experienced physicians. If interested, feel free to access other resources like rheumaknowledgy.com, [uptodate](http://uptodate.com), [emedicine](http://emedicine.com) or Kelley's Textbook of Rheumatology.

Organized roughly in the order I will be presenting them to you in the coming days:

<https://rheumatology.org/patients/osteoarthritis>

<https://rheumatology.org/patients/rheumatoid-arthritis>

<https://rheumatology.org/patients/lupus>

<https://rheumatology.org/patients/inflammatory-myopathies>

<https://rheumatology.org/patients/sjogrens-syndrome>

<https://rheumatology.org/patients/igg4-related-disease-igg4-rd>

<https://rheumatology.org/patients/scleroderma>

<https://rheumatology.org/patients/gout>

<https://rheumatology.org/patients/calcium-pyrophosphate-deposition-cppd>

<https://rheumatology.org/patients/spondyloarthritis>

<https://rheumatology.org/patients/psoriatic-arthritis>

<https://rheumatology.org/patients/reactive-arthritis>

<https://rheumatology.org/patients/vasculitis>

<https://rheumatology.org/patients/polymyalgia-rheumatica>

<https://rheumatology.org/patients/giant-cell-arteritis>

<https://rheumatology.org/patients/takayasu-arteritis>

<https://rheumatology.org/patients/granulomatosis-with-polyangiitis-wegeners>

<https://rheumatology.org/patients/henoch-schonlein-purpura-hsp>

Hope to see many of you on Monday!

Steve Lee, DO FACR
