

Group Exercise #1 - Review the case as a group.

Determine what type and level of medical error occurred.

category F

Other: cx error, system error

procedure started but unknown how far into it - but did cause somethin
delaying care for aneurysm

List all of the given evidence of medical error. If adequate information is not given in the case, cite any of the possible sources of error that you can come up with.

not confirming name and dob

Identify the key players who were at fault. (Note: often more than one person is at fault)

person who answered phone, nurse who wok Mrs. Morris, attending,
resident, electrophys attending

List factors that might have led to the error.

assuming person further up in line confirmed, especially those who wer
fatigue - end of shift
communication important, listen to colleagues, explore their concerns
no order for it

What emotions would you have if you were one of the key players identified above?

fatigue
urgency - stressed, hurried
overwhelmed - responsibility on someone else (deferring to more senior and if senior n

What could have been done to avoid this error?

checking pt identity

What systems could be put in place to avoid such an error in the future?

MFA
time out before starting surgery to verify info
MRNs for identity - verify at each stage of the pt bei
every person involved asks for pertinent info
name alert on epic
see pt before procedure - pre-op

We will practice the process of disclosure and making amends for the error. Think of all of the tools that you could use in facilitating the exchange between yourselves (the medical providers) and the people affected by the error (this may be the patient and/ or family members).
