DOORWAY INFORMATION / CHART

Patient Name	Adam Graham
Age/Date of Birth	29; 07/01/1993
Gender	Man
Sex Assigned at Birth	Male
Clinical Setting	Outpatient Center / Primary Care Clinic Same Day Appointment
Chief Concern	Headache

Vital Signs	
Weight	168 lbs (76.2 kg)
Height	5' 10" (178 cm)
BMI	24.05
BP	120/70 mm Hg
Pulse	70/min
Respirations	18/min
Pulse oximetry	99% on RA
Temp	97.9 DegF (36.6 DegC)
Pain	7-8/10

Clinical Reasoning/Presentation/Treatment Plan:

This is a _____ with a PMH of _____, presenting with a CC of _____ x (Duration) _____.

Summary sentence: My working Diagnosis is: _____, supported by:

1. _____
2. _____
3. _____
4. _____ (need at least 4 – Prefer from both HX and PE)

Other possible diagnoses that are less likely (need at least one reason)

- | | |
|----------|---------------|
| 1. _____ | Reason: _____ |
| 2. _____ | Reason: _____ |
| 3. _____ | Reason: _____ |

I would like to implement the following treatment:

Medications:

Diagnostic Studies:

- Labs:
- Imaging:
- Other Studies:

OMT:

Education:

Follow Up:

- With PCP:
- Referral/Consultations:

NOTE: If a history question or physical exam finding is not listed here, proceed as if it is normal.

	Name of patient	Adam Graham
	Clinical Setting	Outpatient Center / Primary Care Clinic
	Introductions How can I address you?	Adam is fine.
	HPI (OLDCARTS)	
	Chief Concern What brings you in today? <i>Empathy opportunity</i>	I have a headache.
	Onset When did you first notice the pain? When did the headache start?	About 2 hours ago.
	Precipitating events Did anything in particular happen around that time? Did you injure your head?	No, I do not remember anything in particular.
	Previous episodes Have you had headaches like this before?	I have had occasional headaches in the past but never this bad and not often, maybe once every other month.
	Location Where is the pain?	On the right side of my head, particularly my forehead and the area around my eye.
	Radiation Is the pain only in those places, or does the pain travel to other places?	Well, it hurts the most in the front, but really the entire right side of my head is throbbing. I do not have pain anywhere else though, if that is what you mean.
	Progression/constant/intermittent Is it getting better, worse, or about the same? Is it constant or does it come and go?	It is getting worse. It's been a constant headache for the past 2 hours.
	Quality How would you describe the pain? Sharp, dull, throbbing, burning?	It is a throbbing pain.
	Aggravating factors Anything that makes the pain worse?	Moving. And the bright light in this room also makes it worse.
	Relieving factors Anything that makes the pain better?	If I lay down and do not move, my head feels a little better.
	Intensity (on a scale from 0-10) On a scale from 0 to 10, with 0 being no pain and 10 being the worst pain you've ever experienced, what number would you rate it?	It is a 7-8.

	Associated Symptoms	Remember to ask about 1 symptom at a time.
	Any nausea?	I feel a little bit nauseous.
	Vomiting?	I have not vomited.
	(if not asked during HPI/precipitating factors, can ask here also) Any injuries to the head?	No.
	Fever?	No.
	Chills?	No.
	Any problems with sleeping? <i>Empathy opportunity</i>	I have been really stressed lately because I am trying to find a new job, so I've been staying up late to write applications. I have trouble falling asleep with so much on my mind, anyway, so I might as well do something productive.
	How is your appetite?	My appetite has been good. Last night I actually got really hungry and ate two cans of ravioli.
	Have you been sick recently? Any recent infections?	No.
	Any dizziness, feeling as if your surroundings are spinning?	No.
	Photophobia (if not asked during HPI/aggravating factors, can ask here also) Any eye discomfort in bright light?	Light makes my headache worse.
	Blurred vision?	No, I can see fine.
	Difficulty speaking?	No.
	Weakness Any difficulty with moving your arms or legs?	No.
	Numbness?	No.
	Tingling?	No.
	How is your mood? Anxiety? Depression? Stress?	I think my mood is generally good. I have just been really stressed out. (also see Problems with Sleeping above)
	Lacrimation Watery eyes?	No.
	Nasal congestion? Runny nose?	No.
	Feeling restless?	No.
	Sweating? How long has that been going on for?	Yes, I feel like my face is really sweaty. About the same time as the headache.

	Past medical history+	
	Past medical history Have you been diagnosed with any medical problems in the past? For example, high blood pressure, diabetes?	No.
	Allergies Any allergies to medications?	Penicillin.
	What type of reaction did you have?	I got a really bad rash all over my body.
	Allergies Any allergies to certain foods? Any allergies to latex?	No. No.
	Medications Do you take any medications?	I took some ibuprofen about an hour ago. It only helped a little, and it's hard for me to focus because of the pain. Other than that, I do not take any prescription medications.
	Medications How much of the ibuprofen did you take?	2 of the 200 mg capsules (400 mg)
	Hospitalizations Any overnight stays at the hospital?	None.
	Past surgical history Any surgeries in the past?	None.
	Family history Any health problems in the family? How are your parents doing? How's their health? <i>Empathy opportunity</i>	My mom had a stroke last year just before she turned 65. The rest of my family is healthy.
	Social history	
	Do you smoke tobacco?	Yes.
	How much do you smoke?	I have smoked about 2 packs a day since I was 15.
	How much alcohol do you drink? <i>Empathy opportunity</i>	I do not usually drink, but last weekend I drank some red wine with my wife to celebrate the fact that I finally got invited to an interview for a great job at a tech start-up.
	Recreational drugs Anything else? Marijuana, cocaine, methamphetamines, etc.	Never.
	Diet <i>Empathy opportunity</i>	I think I typically have a balanced diet. Lately the money has been a little tight, so we have had to cook more ourselves, which is probably healthier than eating out all the time anyway.

	Caffeine	I start every workday with a cup of black coffee.
	Exercise	I do not get to exercise much; I spend most of my time working at my desk at home.
	Work <i>Empathy opportunity</i>	I used to work as a project manager for a construction company, but they went out of business six months ago. I have been looking for a new job since then and have a job interview tomorrow.
	Home What is your living situation like? Who lives at home with you?	I live with my wife and my daughter.
	Sexual Activity	Yes, with my wife only.
	EMPATHY QUESTION ASK BEFORE OR DURING THE PHYSICAL	I have a job interview tomorrow, and I've just been really stressed out. Can you give me some medication to make this headache go away, so that I can feel better going into the interview?
	Physical Exam	
	Washed hands	Student Dr. must wash hands before examining the patient, or else it will count as a Red Flag.
	Handled patient's gown respectfully Used proper draping as needed	Student Dr. should auscultate/palpate directly on skin when they can, unless it's over a sensitive region of the body.
	Review patient's vital signs	
	General Assessment <i>Empathy opportunity</i> /Sample Response: "Adam, I understand that this job interview is important to you. I can assure you that we will do our best to get you out of here as soon as possible. But before I give you any medication, I would like to ask you a few more questions and perform a physical examination. It is important that I get a better idea of what is causing your headache so that I can treat you appropriately. How does that sound?"	CARD #1 29-year-old man, appears well-developed, well-nourished, alert, and in mild distress due to pain and sensitivity to the bright light in the room.
	Head, Eyes, Ears, Nose, Throat (HEENT)	CARD #2
	Inspection of the head	Normocephalic, atraumatic.
	Palpation of the head	Non-tender.
	Inspection of the conjunctivae	No conjunctival injection or lacrimation.
	Direct fundoscopy	Normal.

	Neck	
	Inspection of the neck	Normal.
	Palpation of the neck for lymphadenopathy	No lymphadenopathy.
	Focused Osteopathic Structural Exam	CARD #3
	Prioritize thoracic region, T1-T4 (sympathetics to the head and neck). - Tissue texture changes - Tenderness	T1-T4 region: Increased temperature, increased skin drag, increased moisture, boggy, and tender. Hypertonic paraspinal muscles.
	Cardiovascular	
	Auscultation of the heart ("APTM")	Regular rate and rhythm. S1 S2 present. No murmurs.
	Respiratory	
	Auscultation of the posterior lung fields	Clear to auscultation bilaterally. No crackles or wheezes.
	Abdomen	
	Inspection of the abdomen	Soft, non-distended.
	Auscultation of the abdomen	Bowel sounds present and normoactive in all 4 quadrants.
	Light and deep palpation of the abdomen	Non-tender.
	Neurologic	
	<u>Mental Status</u> Orientation to person, place, and time. These questions might seem silly Person (already done when asking the patient how they like to be addressed) Place: Can you tell me where you are right now? Time: What's today's date?	Touro Clinic in Vallejo Tuesday, October 25, 2022
	<u>Cranial Nerves</u> - Visual Fields (CN II) - Extraocular movements (CNs III, IV, and VI; can be done with HEENT) - Facial Sensation and Strength of the muscles of mastication [open and close their mouth] (CN V; can be done with HEENT) - Facial movements [forehead and nose wrinkling, closing the eyes tightly, inflating/puffing the cheeks, smiling showing teeth] (CN VII)	Cranial nerves II-XII all intact bilaterally.

	- Hearing with finger rub test or whisper test (CN VIII) - Elevation of the soft palate and uvula (CN IX and X) - Strength of trapezius and SCM (CN XI) - Movement of the tongue (CN XII)	
	<u>Motor</u> / ROM of the cervical spine	No restrictions with active range of motion.
	<u>Coordination</u> - Rapid alternating movement test - Finger-Nose-Finger Test	Normal.
	<u>Reflexes, Deep Tendon</u> - Biceps (C5-C6) - Brachioradialis (C5-C6) - Triceps (C7-C8) - Patellar (L2/L3-L4) - Achilles (S1-S2)	DTRs 2+/4 bilaterally and equal.
	<u>Sensation</u>	Normal.
	<u>Gait</u>	Normal.
	Babinski sign	Plantarflexion of all toes bilaterally.
	Romberg test	Closing the eyes does not affect the patient's balance.
