

Student Doctor:

Faculty Proctor:

Station 1: OCMM and TMD (8min)

Carefully examine the cranium in a proper contact.

1. Biomechanics (SD/patient comfort, appropriate posture/tension)	2	1	0
2. Contact accuracy (location and pressure)	2	1	0
3. Static Findings (accuracy and terminology, examples: hard/soft, narrow/full, symmetry/asymmetry, shape)	2	1	0
4. Dynamic Findings (accuracy and terminology, examples: symmetry/asymmetry of motion based on position, rate, or strain pattern)	2	1	0

Perform a technique below after using the appropriate diagnosis.

Techniques	Diagnosis
Condylar Decompression	Assess for restriction at the condyles with gentle traction
Venous Sinus Drainage- demonstrate 2, name 6 positions	Assess for congestion in the vault contact
Parietal Lift	Static and dynamic assessment at parietal bones
Frontal Lift	Static and dynamic assessment at frontal bone
V Spread on OM Suture	TART over sutures, motion in vault or OM suture hold
LS Decompression	Lumbosacral springing
SI Decompression	ASIS compression test, Innominate motion on SI joint, OR springing directly on joint
SCM Muscle Energy	TART
Bilateral mandibular ME	Motion test laterally, sup/inf, & rotatory
Lateral pterygoid muscle inhibition	TART internally OR assess jaw with two finger test for looser side
Bilateral mandibular BLT	Motion test laterally, sup/inf, & rotatory

1. Biomechanics (table height, SD/patient comfort)		2	1	0
2. Assessed appropriately for given treatment (1 for correct assessment, 2 for accurate dx)	3	2	1	0
3. Accurate anatomic contact		2	1	0
4. Palpatory contact (pressure, gentle, thoughtful)	3	2	1	0
5. Treatment execution (at barrier/ease/balance point, forces appropriate, process correct)	3	2	1	0

2025 OPP3 BLOCK 2 PRACTICAL EXAM

6. Effectiveness (creates change in tissues)			1	0
7. Reassess (change during treatment vs repeat initial assessment)			1	0
8. Overall understanding/efficiency		2	1	0

Deducted Points for Prompting -2 -1

Station 1 Total ____/25

Station 1 Communication (ICS)

3 2 1 0

Communicates in proper non-physician language to partner (1 point), communicates in proper physician language to proctor (1 point), and asks consent before starting (1 point).

Station 2A: Lower Crossed Syndromes (6min)

Demonstrate one diagnostic test on your patient as assigned.

- | | |
|--|--|
| <ul style="list-style-type: none"> • Pelvic Clock Tilt and Rotation Test • Pelvic Tilt with Hip Abduction Test • Hip Extension Firing Pattern | <ul style="list-style-type: none"> • Pelvic Tilt with Heel Slide Test • Hip Abduction Firing Pattern |
|--|--|

1. Performs correct test with appropriate position/contact	2	1	0
2. Clearly states what are Pass/ Fail criteria with accurate interpretation of test	2	1	0
3. Diagnostic Understanding of which muscles are inhibited (2=all correct, 1=most correct, 0= several incorrect)	2	1	0
4. Diagnostic Understanding which muscles are facilitated (2=all correct, 1=most correct, 0= several incorrect)	2	1	0
5. Diagnostic efficiency/biomechanics	2	1	0

Demonstrate one MET, home-stretch, and retraining exercise on your patient based on results of above test.

- | | |
|---|--|
| <ul style="list-style-type: none"> • Prone Iliopsoas/Anterior Hip Capsule Assessment & Stretch • Prone Rectus Femoris Assessment & Stretch • Supine Adductor (short or long) assessment & stretch • TFL/Quadratus lumborum Assessment & Stretch | <ul style="list-style-type: none"> • Pelvic Clock Retraining • Hip Extension Firing Retraining • Gluteus Maximus Retraining • Gluteus Minimus Retraining |
|---|--|

1. Appropriate positioning/localization for stretching and strengthening	2	1	0
2. Engages the correct muscle for the stretch/retraining		1	0

2025 OPP3 BLOCK 2 PRACTICAL EXAM

3. Utilizes the Steps of ME to assist with the stretch		1	0
4. Demonstrates appropriate home stretch exercise		1	0
5. Demonstrates appropriate home retraining exercise		1	0
6. Good tissue handling skills		1	0
7. Overall understanding and efficiency		1	0

Deducted Points for Prompting -2 -1

Station 1 Total ____/18

Station 2 Communication (ICS)

3 2 1 0

Communicates in proper non-physician language to partner (1 point), communicates in proper physician language to proctor (1 point) and asks consent before starting (1 point).

Station 2B: Upper Crossed Syndromes (6min)

Demonstrate one diagnostic test on your patient as assigned.

- Cervical Flexion Test
- Scapular Depression Test
- Bilateral Shoulder Abduction Test
- Supine B/L Shoulder Flexion Test
- Scapular Stabilization Test

1. Performs correct test with appropriate position/contact	2	1	0
2. Clearly states what are Pass/ Fail criteria with accurate interpretation of test	2	1	0
3. Diagnostic Understanding of which muscles are inhibited (2=all correct, 1=most correct, 0= several incorrect)	2	1	0
4. Diagnostic Understanding which muscles are facilitated (2=all correct, 1=most correct, 0= several incorrect)	2	1	0
5. Diagnostic efficiency/biomechanics	2	1	0

Demonstrate one MET, home-stretch, and retraining exercise on your patient based on results of above test.

- Upper Trapezius Stretch
- Posterior Shoulder Capsule Stretch
- Sternocleidomastoid stretch
- Seated Cervical Flexion Retraining
- Latissimus dorsi Stretch
- Rhomboids Retraining
- Levator Scapulae Stretch
- Lower Trapezius Retraining
- Pectoralis Major/Minor Stretch
- Serratus Anterior Retraining

1. Appropriate positioning/localization for stretching and strengthening	2	1	0
2. Engages the correct muscle for the stretch/retraining		1	0
3. Utilizes the Steps of ME to assist with the stretch		1	0

2025 OPP3 BLOCK 2 PRACTICAL EXAM

4. Demonstrates appropriate home stretch exercise		1	0
5. Demonstrates appropriate home retraining exercise		1	0
6. Good tissue handling skills		1	0
7. Overall understanding and efficiency		1	0

Deducted Points for Prompting -2 -1

Station 1 Total ____/18

Station 2 Communication (ICS)

3 2 1 0

Communicates in proper non-physician language to partner (1 point), communicates in proper physician language to proctor (1 point) and asks consent before starting (1 point).

Overall Performance:
☐ Leading (5): In addition to an integrated and fluid performance, student demonstrates exceptional thoughtfulness and skill in performance
☐ Strong (4): Integrated and fluid performance
☐ Solid (3): Somewhat integrated and fluid performance
☐ Building (2): Demonstrates understanding of basic concepts, but performance is not integrated or fluid
☐ Not meeting expectations (1): not demonstrating understanding of concepts, not well-practiced
☐ Not prepared (0)

Station 1 Subtotal: __/25

Station 2 Subtotal: __/18

Overall: __/5

Total: __/48

Communication: __/6
