

Lower Crossed Syndrome

Dx Test	MET - Associated Hypertonic Muscle	Self-Stretch Associated Hypertonic Muscle	Retraining of Pseudoparesis
"Pelvic Clock" tilt and rotation	QL on the side of the inferior ASIS	QL on the side of the inferior ASIS	"Pelvic Clock" tilt and rotation
Pelvic 12 o'clock Tilt with Hip ABduction	Hip Adductors on the side of the inferior ASIS	Hip Adductors on the side of the inferior ASIS	Pelvic Tilt with Hip ABduction
Pelvic 12 o'clock Tilt with Hip Heel Slide	Psoas on the side of the anterior ASIS	Psoas on the side of the anterior ASIS	Pelvic Tilt with Hip Heel Slide
Hip Extension Firing Pattern	Psoas /Rectus Femoris	Psoas /Rectus Femoris	Glut Max
Hip ABduction Firing Pattern	TFL/QL, whichever fired first	TFL/QL, whichever fired first	Glut-Med Clam Shells

Upper Crossed Syndrome

Dx Test	MET - Associated Hypertonic Muscle	Self-Stretch Associated Hypertonic Muscle	Retraining of Pseudoparesis
Supine Cervical Flexion Nod Test	SCM, on the tightest side	SCM, on the tightest side	Seated Cervical Flexion
B/L Shoulder ABduction	Levator Scapulae on the elevated side	Levator Scapulae on the elevated side	B/L Lower Trapezius, focus on the affected side
Scapular Stabilization	Pec Major/Minor on the winged side	Pec Minor/Major on the winged side	Serratus Anterior on the winged side
Prone Scapular Depression	Upper trapezius on the weak side	Upper Trapezius on the weak side	B/L Lower Trapezius, focus on the affected side
Supine B/L Shoulder Flexion	Latissimus Dorsi on the tightest side	Latissimus Dorsi on the tightest side	B/L Rhomboids, focus on the affected side
