

2025 MSK Practical Likert's scale

History (25%)

Element	Misses Expectations	Proctor MUST list <u>detailed commentary</u> in this column for EVERY ROW that the student missed expectations	Meets Expectations	Exceeds Expectations
Organization and flow	Disorganized in several areas; Flow needs improvement		Organized with steady flow	Well organized; Easy to follow student's thought process and clinical reasoning through questions
Adequacy of HPI, including other MSK focused questions <i>Trauma, mechanism of injury, activity change, if upper extremity, can ask hand dominance (sick contacts, vaccines, travel not necessary unless SD thinks applicable to case)</i>	Missed multiple key components		Missed few key HPI questions	Missing very few if any HPI questions
Associated symptoms Relevance to the CC and demonstrates understanding of disease process	<10 questions; at least 5 relevant		10 questions; at least 6 or more relevant	>10 questions; all relevant to MSK history and patient's case
Higher-order questions (ie. Follow-up questions to positive responses)	Did not ask any follow-up questions to positive responses		Asked at least one follow-up question to positive responses, however, does not ask most pertinent follow-up questions	Asked all appropriate follow-up questions to positive responses, including pertinent details.
PMH PSH Trauma Hx Social Hx FH	Did not ask patient if this info was updated for visit		Confirms with patient that all information was updated at the visit	

Please only clarify if pertinent to case				
Meds Details: freq, dosing, route of admin, taking as prescribed	Did not ask about medications		Confirmed what they are taking	Asked for details, dosing, how often.
Allergies	Did not ask about allergies		Confirmed allergies	Confirmed allergies for meds, food, and latex AND asked about reaction
Overall for section	Student misses expectations if they have <u>4 or more in the misses column.</u>		Student meets expectations if they have <u>3 or less in the misses column and/or the exceeds column.</u>	Student exceeds expectations if they have <u>none in the misses column AND 4 or more in the exceeds column.</u>

Physical Examination (35%)

Element	Misses Expectations	Proctor MUST list <u>detailed commentary</u> in this column for EVERY ROW that the student missed expectations	Meets Expectations	Exceeds Expectations
	Please leave commentary in column to the right			
Organization and flow (top down)	Disorganized exam (jumped around)		Flow of exam made sense	Exam flowed well; timely
Adequacy/ relevance of exam components for clinical reasoning	Missed several components needed to make Dx		Missed one or less key components; additional exam techniques may	Missed no key components; exam components relevant to CC or student's ddx

			or may not be relevant to CC	
Osteopathic structural examination performed and integrated Minimum exam defined to be TART: Skin drag, temp, TART, ROM (exams cervical/thoracic for neck/UE issue; exams thoracic/lumbar for Back/LE issue)	NO or Partial TART exam (missing one or more of the four components) <i>with or without</i> extra osteopathic exam techniques		Minimum exam (defined as TART) <i>integrated or added</i> on to end of physical exam	Minimum exam (defined as TART) <i>integrated</i> into exam <u>PLUS</u> extra techniques pertinent to CC or ddx (i.e neck/ue: thoracic inlet, back/le: fibular head or tibial torsion)
Basic examination technique skills Prioritizes MSK exam if running out of time. CV/Pulm: Listening posts, ladder fashion, auscultate entire cardiac and resp cycle Examine the region/joint in question thoroughly with Inspection intentional palpation. For the joint above and below general inspection, palpation. INSPECTION (can comment on effusion, ecchymosis, erythema, skin lesions, joint deformity) PALPATION (palpates at joint associated bony anatomy,	Performs <70% IPROMS the majority of the exam OR 50% of exam with multiple technique errors Does not recognize if neurovascular exam is needed OR performs <50% of exam		Performs I PROMS at least 70% of the necessary exam with few errors Recognizes if Neurovascular exam needed and attempts majority of exam	Performed >90% of IPROMS exam without errors. Recognizes if Neurovascular exam necessary and completes (may not be indicated in case)

bursae, ligament or tendon attachments of joint in question) ROM (test active ROM, if abnormal tests Passive ROM) STRENGTH TESTING joint in question; joint above and below. Correct bracing/stabilizing Neurovascular testing: Sensation, reflexes, pulses, and additional distal strength testing IF Patient reports of radicular symptoms, or if physical exam show muscle atrophy or weakness				
Special Tests – Indications for performance <i>SD uses their DDX to select special tests to perform. Uses them for working Dx and tests that make others in DDX less likely</i>	Missed indicated special test(s) and performed special tests that were not indicated. Did not have a clear DDX and performed tests at random		Performed most indicated special test(s) (may have done unnecessary special tests) that are related to their DDX -uses findings on PE to help choose special tests.	Performed all indicated special test(s) only that are related to DDX and did not miss tests necessary to aide in diagnosis.
Special Tests – Technique <i>SD performs special test with correct positioning and stability as taught (study guide is standard)</i>	Performed special test(s) with significant (>70%) errors or did not perform		Performed special test(s) with minimal error (<70%) which would not influence interpretation	Performed special test(s) with no errors
Explaining and instructing exam techniques to the	Lacks clear explanation or instruction		Explained clearly most exam techniques being	Explained clearly to patient all techniques being done; instructs

patient for participation (including structural exam and use of exam table)	of exam techniques; minimal or no instruction during exam		done; instructs patient through exam most of the time	patient throughout whole exam
Overall for section	Student misses expectations if they have <u>4 or more in the misses column.</u>		Student meets expectations if they have <u>3 or less in the misses column and/or the exceeds column.</u>	Student exceeds expectations if they have <u>none in the misses column AND 4 or more in the exceeds column.</u>

Interpersonal Communication and Professionalism (15%)

Elements	Misses Expectations	Proctor MUST list <u>detailed commentary</u> in this column for EVERY ROW that the student missed expectations	Meets Expectations	Exceeds Expectations
	Please leave commentary in column to the right			
RED FLAGS Lack hand washing, introduction, confirming with two patient identifiers, NOT ensuring patient comfort & modesty, finished too early without addressing	2 or more “red flags”		1 “red flag”	No “red flags”

appropriate components, inappropriate touching				
Summarizing/ Reviewing Hx w/Patient	Did not summarize hx before moving forward to the physical exam OR may have <i>inaccurately</i> summarized.		Summarized hx before moving forward to physical exam, however may not have been succinct.	Summarized hx succinctly before moving forward to the physical exam, using no more than 1-3 sentences.
Rapport & Relationship Building (components to look for: eye contact, body language, cadence, positive reinforcement, attentiveness, active listening, engaged, use of preferred name/pronouns, use of motivational techniques)	Minimal to no attempt to build rapport. OR Student doctor has implicit bias which negatively impacts the patient - physician relationship. <i>(If so, MUST note in the column to the right.)</i>		Attempts to build rapport on several occasions. May need refinement in technique.	Strong relationship and rapport building. Skills applied throughout the history and physical exam.
Preparation (components: appropriate and clean attire; equipment (utilizes own personal equipment, charged, ready, and able to use without difficulty))	Does not have one or more of the components listed to the left		Meets all components in the left hand column	
Maintaining physician role Sat down when taking history. Focuses on patient and	Breaking role as student doctor. Standing while taking history.		Treated this as a true patient scenario.	Meets <u>PLUS</u> Answered patient questions with some detail. Comfortable with the process and

Avoids looking to faculty for cueing.				no signs of breaking role.
Findings Presents pertinent findings elicited by the student's history and physical exam	Presents information not elicited.		Presents only findings actually elicited.	Presents only pertinent information for decision making.
Overall for section (6)	Student misses expectations if they have <u>3 or more in the misses column.</u>		Student meets expectations if they have <u>2 or less in the misses column and/or the exceeds column.</u>	Student exceeds expectations if they have <u>none in the misses column AND 3 or more in the exceeds column.</u>

Clinical Reasoning (25%)

Element	Misses Expectations	Proctor MUST list <u>detailed commentary</u> in this column for EVERY ROW that the student missed expectations	Meets Expectations	Exceeds Expectations
	Please leave commentary in column to the right			
Working Diagnosis Supports <u>MUST</u> include <i>2 items from history</i> and <i>2 items from physical exam</i> - if not met, student "misses expectations"	Working Dx incorrect or correct without required supporting information		Correct working Dx and able to provide required supporting information OR Working Dx incorrect but able to provide required	Working DX must be correct, with more than the required relevant supports

			supporting information	
DDx MUST cite: At least one item from hx OR physical to support why differential was considered <u>AND</u> At least one item from hx OR physical to support why differential is less likely	Able to provide 2 or less Dx in DDx. OR Unable to adequately support DDx.		Able to provide 3 DDx and able to adequately support 2 Dx.	Able to identify 3 appropriate DDx and able to adequately support all 3 Dx.
Treatment plan Includes: meds Names specific med (not class), labs, imaging/ diagnostics, OMM, education, follow-up/referral	Treatment plan not cohesive for the diagnosis; missing no more than 3 components; diagnostic tests not supported/justified.		Included at least 4 or more components but may not be detailed. Should provide reasoning for most diagnostic tests ordered.	Treatment plan has all 6 components that are correct, detailed, and justified.
OMT	No OMT in plan		OMT is in the plan, may or may not be specific to findings.	Specific OMT treatments identified to match specified somatic dysfunctions and incorporate more than one technique.
Patient Education SD states specific side effects, states ER precautions, recs about activity or lifestyle.	Gave 2 or less non-specific items of patient education		Gave 3 items of patient education and at least 2 items should be specific to the case	Gave 3 or more items of patient education and at least 3 items should be specific to the case
Recognition of urgency and potential patient harm	Unaware of patient diagnostic urgency (if appropriate for the case); Wrong treatment and would harm the patient.		Recognized urgency of case (when appropriate); Wrong treatment but would not harm the patient.	Had an appropriate plan for urgent cases.
Presentation Completed in time allotted	Incomplete presentation in time allotted.		Complete presentation in time allotted.	Detailed and complete presentation in time allotted.

Basic understanding of presentation process	Disorganized presentation.		Orderly presentation.	Presentation exceeds expectations in content and skill.
Terminology (for presentation to faculty)	Used mostly layperson terminology instead of medical terms		Used layperson terminology sparingly and primarily used medical terms	Used no lay terminology and focused on medical terms
Overall for section	Student misses expectations if they have <u>5 or more in the misses column.</u>		Student meets expectations if they have <u>4 or less in the misses column and/or the exceeds column.</u>	Student exceeds expectations if they have <u>none in the misses column AND 5 or more in the exceeds column.</u>
